

HYGAIN
FEEDING CHAMPIONS SINCE 1983

HYGAIN ALLROUNDER™

A cool conditioning pelleted feed

HYGAIN ALLROUNDER™ is a palatable pelleted feed that provides a balanced nutritional diet suitable for horses and ponies being spelled or in light to moderate work.

Ingredients

Ground Wheat, Ground Barley, Sweet Lupin Hulls, Soybean Hulls, Wheat Bran, Rice Bran Oil, Calcium Carbonate, Dicalcium Phosphate, Salt, Potassium Chloride, Magnesium Oxide, L-Lysine, Copper Sulfate, Ferrous Sulfate, Zinc Sulfate, Manganese Sulfate, Potassium Iodide, Vitamin E Supplement, Vitamin A Supplement, Vitamin D-3 Supplement, Biotin, Cobalt Sulfate, Menadione Nicotinamide Bisulfite, Folic Acid, Selenium Yeast, Sodium Selenite, Choline Chloride, Niacin Supplement, Riboflavin Supplement, Thiamine Monotriate, D-Calcium Pantothenate, Pyridoxine Hydrochloride, Vitamin B12 Supplement.

Special Ingredients

Natural Vitamin E - This unique and highly stable form of Natural Vitamin E known as RRR- α -tocopherol is up to 5 times more bio available and potent than regular synthetic sources of Vitamin E. Research has shown that this form of Natural Vitamin E provides higher retention levels in plasma further aiding antioxidant, immune, cardiovascular, circulatory, neuromuscular and reproductive functions.

Sel-Plex® Bio-Available Selenium - Selenium acts as an antioxidant to prevent fatty acid oxidation which can cause tissue damage. Research has shown that Sel-Plex®, an organic form of selenium, is more readily absorbed and retained than selenium in inorganic forms.

Sel-Plex® Bio-Available Selenium

The selenium in Sel-Plex® is an organic selenium, presented in the same forms naturally present in plants. These forms include selenoamino acids and related compounds ideally suited to digestion and metabolism.

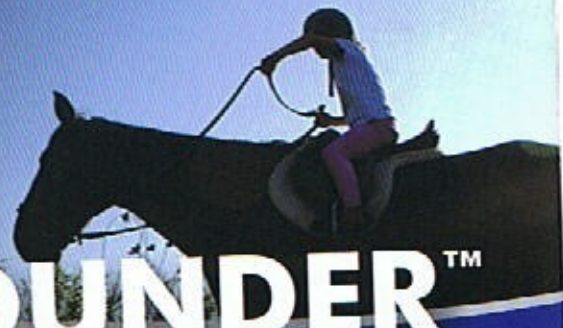

That means the selenium in Sel-Plex® is more digestible than inorganic forms and better retained, which lets the animal build nutrient reserves against periods of increased demand without risking toxicity.

Why replace inorganic selenium with Sel-Plex®?

- Even at maximum allowable levels in production diets, sodium selenite typically does not meet the animal's needs.
- Selenium is a nutrient intended for use in the body's antioxidant defenses. Sodium selenite is selenium in its most highly oxidized and toxic form, leading to oxidative consequences.
- Sodium selenite cannot be converted to the essential amino acid selenomethionine.
- Animals have evolved to use organic forms of selenium. Sel-Plex® provides selenium in the form found in nature so animals can use it efficiently and effectively.
